

STANDARDIZED DISTANCE MARKING BOARDS (SDMBS)

Runway Distance Remaining Signs are used to provide distance remaining information to pilots during take-off and landing operations. The signs are located along one or both sides of the runway at a lateral distance of 45m from runway edge & longitudinal interval of 1000ft. inscription consists of a white numeral on a black background. The signs indicate the distance remaining in thousands of feet. The distance remaining may be 50ft less than shown on the sign. There is a 50ft tolerance in the sign placement. Some signs may be omit because they cannot meet this tolerance. When runway length is not an even multiple of 1000ft, half the "additional distance" is added to the first and last sign placement.

Runway distance remaining signs have a black background with a white number in general however; number '2' have a red background. These numbers on the signs indicates the distance, in thousands of feet, of landing runway remaining.

Features

- Fiberglass composite material
- Lightweight & tough on the same hand
- Solid Base for firm hold
- Designed to withstand severe weather conditions on all airfields
- Easy entry on the back for any maintenance work
- Temperature range -10°C to +55°C
- Bottom Cable entry
- Each sign regardless of type, is tested for the average light output
- Durable structure, able to withstand acoustic vibrations caused by the A/c during takeoff and taxi etc
